We welcome any comments about our site or worksheets on the Facebook comments box at the bottom of each page. Time and date are two relatively important concepts responsible for the moment of events and happenings in our past, present and future lives. We have here, in various ways, a multiple offer of free printable worksheets saying time for grade 1 that will help our kids learn to figure out the time from an analog and digital clock. This exercise was made very simple for our first graders because they will be modeled to tell time only to the entire hour and half an hour. In a similar way, our calendar worksheets for Grade 1 have been diligently designed to help children easily master the days, dates and weeks of the month. These first class says time and calendar activities are so fun and enthusiastic for kids. This is due to its interesting everyday problems, distinguish a.m. from p.m., exploring the calendar to days, dates and weeks of a month, identifying and writing the appropriate time. The act of saying exactly time: Flexible with calendars is a real life skill for children. This is because from a young age to eternity, you will always be interested to know the time and date of a particular event occurred in the past, present and when you will occur in the next hours, days, weeks, etc. This however serve as the best strategy used in programming and managing one's life accurately Ooops kiddos, we always find math in all areas of life, including time and date. Clocks and calendars are brilliant numerical tools. In addition, children will greatly enhance their skills plus as they engage in our time and watch exercise word issues. From an enticing analogy, they will easily determine the duration of an activity by simply adding its number of hours to the time it began. Moreover, to easily master the difference between a.m. and p.m., think of them as; Are. (ante meridiem) means before lunch -- activities performed in the morning before 12:00 pm. (post meridiem) means after lunch -- activities performed from 12:00 in the afternoon and above Let crown the discrepancy above with an example I take my breakfast at 8:00a.m, and I go to bed at 8:00p.m Especially, for children to master the difference between the hour and thirty , they need to know that; For the hour, the long hand in the analog clock must point to 12. For thirty, the long hand in the analog clock must point to 6. You are here: Home --> Worksheets --> Class 1 says time In first grade, children learn to say time to the entire hour and half an hour.
